JASMIN SHAIK

Data Analyst | Data Scientist

+91 6303342584 Ponnur, Guntur Dist.

jasminshaik757@gmail.com linkedin.com/in/jasmin-shaik github.com/jasminshaik15 Portfolio

PROFESSIONAL SUMMARY

Data Analyst with **3.5+ years of experience** in **data analytics, business intelligence, statistical analysis, dashboard development,** and **data visualization**. Proficient in **Python, SQL, Power BI, Grafana, PostgreSQL, Oracle,** and **Microsoft SQL Server**. Experienced in **ETL processes, data cleaning, exploratory data analysis (EDA), KPI reporting, anomaly detection,** and **time-series analysis**. Knowledgeable in **Machine Learning** and **Predictive Modeling**. Proven ability to transform complex datasets into **actionable insights** and support **data-driven decision-making**.

SKILLS

Programming: Python, SQL
Databases: PostgreSQL, Oracle, Microsoft SQL Server
Advanced SQL: Joins, Subqueries, CTEs, Window Functions, Stored Procedures, Views, Query Optimization
Data Analysis: Pandas, NumPy, Microsoft Excel, Data Cleaning, Data Wrangling, ETL, Data Validation, Exploratory Data Analysis (EDA)
Visualization & BI: Power BI, Grafana, Matplotlib, Seaborn, Dashboard Development, KPI Reporting, Business Intelligence
Statistics: Descriptive Statistics, Inferential Statistics, Probability, Hypothesis Testing, A/B Testing, Time Series Analysis
Machine Learning: Scikit-Learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Predictive Analytics, Anomaly Detection
Tools & Platforms: Jupyter Notebook, Google Colab, GitHub, Power BI Service
Soft Skills: Problem Solving, Stakeholder Communication, Data Storytelling, Team Collaboration, Time Management

EXPERIENCE

Data Scientist — Efftronics Systems Pvt. Ltd. *Aug 2023 – Present*

- Developed and maintained **Power BI and Grafana dashboards** for Smart Water Management systems, enabling real-time monitoring of Unaccounted-for Water (UFW) and Per Capita Consumption, contributing to a **40% reduction in water wastage**.
- Designed and implemented real-time leakage detection analytics and reporting solutions, contributing to a **50% reduction in water leakages**.
- Performed time-series analysis and environmental analytics on Temperature, Humidity, CO_2, NO_2, AQI, and IAQ datasets, driving a **2x improvement in air quality metrics**.
- Built operational dashboards for railway platform assets including lighting systems, lifts, and escalators, increasing **energy efficiency by 40%**.
- Developed monitoring and alert management dashboards for Railway Alert Monitoring Systems, **enabling real-time tracking of Critical and Warning alerts generated by trackside safety devices.**
- Performed **data extraction, transformation, validation, KPI reporting, and anomaly detection using SQL and Python** through outlier analysis, threshold monitoring, and trend analysis.
- **Automated reporting workflows** by integrating multiple data sources, improving data accuracy, operational visibility, and stakeholder decision-making.
- Collaborated with engineering, business, and operations teams to transform business requirements into scalable analytical solutions, dashboards, and KPI frameworks.

Data Analyst Intern — Efftronics Systems Pvt. Ltd. ***Sep 2022 – Jul 2023***

- Developed Power BI dashboards for Energy Management Systems covering HVAC, lighting, and solar assets, contributing to a **30% reduction in energy consumption**.
- Built real-time monitoring and visual analytics solutions for Indoor Air Quality (IAQ) systems using CO_2, VOCs, smoke, dust, temperature, and humidity sensor data.
- Analyzed IoT sensor data and generated actionable insights to support predictive maintenance and operational optimization.

PERSONAL PROJECTS

Human Pose Detection and Exercise Tracking System

- Developed a real-time Human **Pose Estimation system using Python, OpenCV, and MediaPipe** to extract and analyze body landmarks from live video streams.
- Engineered features from pose landmark coordinates and joint-angle measurements to identify exercise states and movement patterns.
- **Built an automated Gym Exercise Tracker** capable of repetition counting and posture analysis using skeletal tracking data.

Technologies: Python, OpenCV, MediaPipe, Computer Vision, Machine Learning

Healthcare Analytics and Exploratory Data Analysis Project

- **Performed end-to-end data cleaning, preprocessing, and exploratory data analysis (EDA)** on healthcare dataset to identify trends in patient outcomes, medical conditions, and healthcare operations.
- **Developed interactive Power BI dashboards** featuring key performance indicators (KPIs), doctor-wise analysis, hospital performance metrics, and billing trend visualizations.

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Power BI

CERTIFICATIONS

- HackerRank SQL (Basic, Intermediate, Advanced)
- Data Science with Python – Great Learning
- SQL for Data Science – Great Learning
- Data Visualization with Power BI – Great Learning
- Python Pandas and Numpy Fundamentals – Simplilearn SkillUp
- Virtual Internship in Data Science – APSSDC

EDUCATION

B.Tech in Computer Science and Engineering 2019 – 2023

Rajiv Gandhi University of Knowledge and Technologies (APIIIT, Nuzvid)

CGPA: **9.3**

Pre-University Course (PUC / Intermediate) 2017 – 2019

Rajiv Gandhi University of Knowledge and Technologies (APIIIT, Nuzvid)

CGPA: **9.4**

Class X 2017

Zilla Parishad High School, Nidubrolu

CGPA: **10.0**
