PROFESSIONAL SUMMARY

Data Analyst and Data Scientist with **3.5+ years of experience** in data analytics, business intelligence, statistical analysis, dashboard development, and data visualization. Proficient in **Python, SQL, Power BI, Grafana, PostgreSQL, Oracle, and Microsoft SQL Server**. Experienced in **ETL processes, data cleaning, exploratory data analysis (EDA), KPI reporting, anomaly detection, and time-series analysis**. Skilled in **Machine Learning and Predictive Modeling**. Proven ability to transform complex datasets into actionable insights and support data-driven decision-making.

SKILLS

Programming:	Python, SQL
Databases:	PostgreSQL, Oracle, Microsoft SQL Server
Advanced SQL:	Joins, CTEs, Window Functions, Stored Procedures, Views, Query Optimization
Data Analysis:	Pandas, NumPy, Microsoft Excel, Data Cleaning, ETL, Data Validation, Exploratory Data Analysis (EDA)
Visualization & BI:	Power BI, Grafana, Matplotlib, Seaborn, Dashboard Development, KPI Reporting
Statistics:	Descriptive Statistics, Inferential Statistics, Probability, Hypothesis Testing, Time Series Analysis
Machine Learning:	Scikit-Learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Predictive Analytics, Anomaly Detection
Tools & Platforms:	Jupyter Notebook, Google Colab, GitHub, Power BI Service
Soft Skills:	Problem Solving, Stakeholder Communication, Data Storytelling, Team Collaboration, Time Management

EXPERIENCE

Data Scientist

Aug 2023 – Present

Efftronics Systems Pvt. Ltd.

- Analyzed large-scale IoT, sensor, energy, environmental, and operational datasets using **Python and SQL** to identify anomalies, performance patterns, and optimization opportunities.
- Applied **statistical analysis, time-series analysis, correlation analysis, and anomaly detection** to investigate system behavior and recurring performance issues.
- Developed advanced **Power BI and Grafana analytics solutions** for KPI monitoring, asset health analysis, energy optimization, and operational performance tracking.
- Automated **data processing, validation, and reporting workflows** to improve data reliability and reduce manual reporting effort.
- Translated analytical findings into **actionable recommendations** that supported resource optimization, system reliability, and operational improvements.

Data Analyst Intern

Sep 2022 – Jul 2023

Efftronics Systems Pvt. Ltd.

- Extracted, cleaned, and validated **IoT, sensor, and energy data** using SQL and Python for analysis and reporting.
- Performed **exploratory data analysis (EDA)** to identify data quality issues, trends, and operational patterns.
- Prepared KPI reports and visualizations using **Power BI and Grafana** to support performance monitoring and operational reviews.

KEY PROJECTS

Smart Water Management Analytics

- Built **water consumption, distribution, and UFW analytics** to evaluate leakage patterns, Per Capita Consumption, borewell yield, and pumping performance.
- Implemented **leakage detection and borewell performance analysis**, contributing to a **40% reduction in water wastage** and a **35% reduction in pumping energy costs**.

Technologies Used: Python, SQL, PostgreSQL, Oracle, Power BI, Grafana, Pandas, Anomaly Detection

Environmental and Indoor Air Quality Analytics

- Performed **time-series and environmental data analysis** on temperature, humidity, CO2, NO2, AQI, IAQ, VOC, smoke, and dust sensor data.
- Evaluated **air-quality trends, pollutant patterns, and environmental variations**, supporting improved air-quality monitoring and a **3x reduction in AQI levels**.

Technologies Used: Python, SQL, Pandas, PostgreSQL, Power BI, Grafana, Time-Series Analysis

Railway Asset Monitoring and Energy Optimization

- Evaluated **asset availability, operational status, and energy consumption** across railway platform lighting systems, lifts, and escalators.
- Identified **energy wastage and asset performance patterns**, contributing to a **40% improvement in energy efficiency** and reduced asset unavailability.

Technologies Used: Python, SQL, Pandas, Oracle, Power BI, Grafana, KPI Monitoring

Server Room Monitoring and Cooling Efficiency Analytics

- Performed **correlation and time-series analysis** on IT load, cooling energy, temperature, and humidity data to identify cooling inefficiencies.
- Optimized **AC operating setpoints and cooling strategies** based on load and environmental patterns, contributing to a **30% reduction in cooling energy consumption**.

Technologies Used: Python, SQL Server, Pandas, Power BI, Grafana, Time-Series Analysis, Correlation Analysis

IoT Device Health and Availability Analytics

- Investigated **device health and communication data** to detect offline devices, connectivity failures, and recurring fault patterns.
- Designed **device-health KPIs and availability analytics** to track failure trends and communication performance, improving device availability from **60% to 95%**.

Technologies Used: Python, SQL, PostgreSQL, Power BI, Grafana, Data Validation, KPI Monitoring

PERSONAL PROJECTS

Human Pose Detection and Exercise Tracking System

- Developed a real-time **Human Pose Estimation and Computer Vision system** using **Python, OpenCV, and MediaPipe** to detect and track body landmarks from live video streams.
- Engineered pose-based features using **landmark coordinates and joint-angle measurements** to analyze exercise movements and posture variations.
- Implemented **movement classification logic** to recognize exercise states, movement transitions, and repetition cycles.
- Built an automated **Gym Exercise Tracker** for real-time repetition counting, movement tracking, and posture analysis using skeletal pose data.

Technologies Used: Python, OpenCV, MediaPipe, Computer Vision, Machine Learning

Healthcare Analytics and Exploratory Data Analysis Project

- **Performed data cleaning, preprocessing, and EDA** on healthcare data to identify key trends and patterns.
- Analyzed patient outcomes, medical conditions, billing trends, and hospital performance to generate actionable insights.
- **Developed interactive Power BI dashboards** for KPI tracking, doctor analysis, and healthcare performance monitoring.

Technologies Used: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Power BI

CERTIFICATIONS

- HackerRank SQL (Basic, Intermediate, Advanced)
- Data Science with Python – Great Learning
- SQL for Data Science – Great Learning
- Data Visualization with Power BI – Great Learning
- Python Pandas and Numpy Fundamentals – Simplilearn SkillUp
- Virtual Internship in Data Science – APSSDC

EDUCATION

B.Tech in Computer Science and Engineering	2019 – 2023
Rajiv Gandhi University of Knowledge and Technologies (APIIT, Nuzvid)	
CGPA: 9.3	
Pre-University Course (PUC / Intermediate)	2017 – 2019
Rajiv Gandhi University of Knowledge and Technologies (APIIT, Nuzvid)	
CGPA: 9.4	
Class X	2017
Zilla Parishad High School, Nidubrolu	
CGPA: 10.0
